

How to Do Business with WCS:

WCS strives to be a customer-oriented company; however, with regulations associated with our business, it can seem very difficult to ship waste to WCS. WCS works with customers to guide them through this process.

Each form required by the TSDf Waste Acceptance Criteria is available on our web site <http://www.wcstexas.com/facilities/documents-and-forms/> or by contacting Customer Service at (888) 789-2783.

- Set up a credit account with WCS
- Review and execute a WCS Environmental Service Agreement (ESA)
- Ensure each waste meets the Texas State Notification Requirements
- Sign a quote letter from WCS for each waste stream
- Submit a WCS profile for each waste stream to be shipped and receive an Acceptance Letter from WCS. Rush acceptance can be accommodated in emergency situations.
- If required, submit a representative pre-shipment sample. Do not submit a sample without a request from WCS.
- Submit a 5-day advanced shipment request and advance draft manifest and receive shipment approval from WCS prior to commencing transportation
